

"When it comes to slitting technology, Red Bud is in a class by itself. And Red Bud support is world class too."

*Steve Sackenheim, VP Operations
Matandy Steel and Metal Products*

Ten years ago, we decided to enter the slitting business. We evaluated all slitter suppliers and saw that Red Bud clearly had the best technology – safety, set ups, throughput – they were top of the class. And no one else offered a 5 year warranty.

The decision to go with Red Bud has really paid off. The line is durable, accurate and Red Bud keeps us updated with new features they develop that make it perform even better. And you can't ask for more responsive support. Anyone looking for a slitter would do well to talk to Red Bud.

SLITTING

Our High Speed Slitting Lines feature the quickest set up and changeover, with totally 'hands-free' threading from Uncoiler to Recoiler clamp. Add our CNC Fully Automatic Slitter Head for two minute knife setup – *with no operator assistance* – and you have the slitting line which is the standard for excellence in the service center industry for safety, reliability, accuracy, and production output.

Line Width:	up to 84"
Material Gage:	up to 0.500"
Max Coil Weight:	up to 80,000 lb
Production Speed:	up to 2000 ft/min
