

"Red Bud's technology gave us a clear competitive advantage.
Their service helps us maintain it."

*Steve Klomps, Operations Mgr.
McNeilus Steel, Inc.*

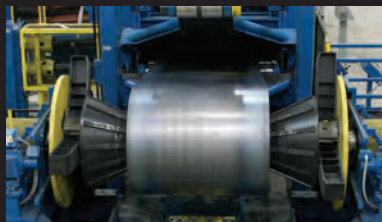

At McNeilus Steel, we succeed by adapting to our customers' needs. They needed 'stay flat' steel blanks, so we invested in a Red Bud Blanking Line with Stretcher Leveling. Our customers were delighted with the product, but also wanted it in heavier gage. We thought we'd have to buy a temper mill, but Red Bud adapted to our needs and produced the first-ever .500" Stretcher Leveler CTL Plate Line. We were so pleased we bought two more. Not just because of the technology, but also because Red Bud supports us so well. They're a 'customer first' company.

BLANKING

Red Bud leads all in high production blanking – over 500 systems installed.

CTL PLATE

CTL Lines process up to 0.750" x 96" with unrivaled Red Bud automation.

LEVELING

Red Bud's Stretcher Levelers deliver 'stay flat' sheets that beat temper pass.
