Oilfield Pipe & Supply (OPS) Sales Company

is a wholesale structural steel supplier that has been in business for over 35 years. They service road and bridge construction, piers, cattle working equipment, and the agricultural industry.

In 2017, OPS Sales purchased a pipe mill to produce small OD pipe for cattle fencing and gates. Initially, they used local toll processing companies for their slitting work. As their demand grew, OPS Sales decided to look into acquiring a slitting line of their own. After some research, Adam Kimrey advocates that Red Bud Industries' family atmosphere and top-of-the-line product made their decision easy.

"At the end of the day, Red Bud Industries' sophisticated Slitting Line does everything we hoped for and more. The biggest surprise and relief have been the exemplary service and support. The fact that they are a family owned company really fit what we were looking for."
