Red Bud Industries

This is one big green machine! Equipped with a 3000 ton Stretcher and a specifically designed 1200 HP (895 KWh) Flattener, this 1.00" (25 mm) x 96" (2438 mm) capacity system is one of the biggest and most powerful Stretcher Leveler Cut-To-Length Lines on the planet!

"We have been in the cut-to-length business for quite some time, and our existing CTL was showing its age and was limited as to what we could process. In order to grow our business and market share we knew we had to invest in a new line. There were already other lines in the market that had stretching capabilities and we didn't want to be just another face in the crowd. We wanted something that would set us apart from the competition. So, we partnered with Red Bud Industries to design and build the biggest and most capable Line in the industry."

Gerald Varzari, Owner
