**Greenpoint Metals** is a family-owned business that has been in operation for over 40 years. Located in Franklin, Ohio, they are a secondary processor of steel with a focus on sheet and coil. Greenpoint Metals is a customer-focused company that primarily serves the construction, mining, and other OE related businesses.

When Greenpoint Metals decided to offer sheet steel to their customers, they immediately began working with Red Bud. Though not initially planned, Greenpoint Metals added the Red Bud Stretcher Leveler to their line in order to better serve the needs of their customers.

"One of the reasons we went with Red Bud was their level of support. Not only were they phenomenal in helping us launch the line, but their collaboration in helping us design the line was a huge resource for Greenpoint Metals. Red Bud was able to specify every detail needed to produce a wide range of products for our growing customer base."
