Multi-Blanking Line with Stretcher Leveler

RED BUD'S STRETCHER *IS PERFORMING* EVEN BETTER THAN WE EXPECTED!

As the thin gage, hot rolled market became more and more competitive in Israel, we realized that producing a "good" product was not enough. We wanted to separate ourselves from our competitors by being able to offer extremely flat, low stress material. After looking at our options, we decided that a Red Bud Line with a Stretcher Leveler would give us the capability to offer a product that no one else could match.

Now that our line is in operation, it is performing even better than we had expected. The Stretcher has lived up to its reputation. We are able to produce stress free material that stays flat even after secondary operations, no spring back! Laser cutters, in particular, have been enthusiastic about the product. Another of our goals was achieved by reducing the number of our shears, thanks to Red Bud's Multi-Blanking System in our line.

The addition of Red Bud's integrated line has not only increased our efficiency, but has given us a competitive advantage in our market at a time when every customer counts.

! Ask us about our Turnkey solutions for retrofitting our
Stretchers into your existing line.
