

“The line has done everything we have asked and more”

“Before purchasing our new line, we talked to many different people that owned or had experience with Red Bud Industries’ lines. All were extremely satisfied. I also looked at competitor’s equipment but just felt they weren’t as well put together. I always felt Red Bud wasn’t trying to oversell their equipment. The line has done everything we have asked and more. It allows quick turnarounds for quick deliveries and produces tolerances closer than we thought possible. I have been very pleased with the performance and durability of the line. Our experience with Red Bud has been very good.”
