

**“We are very impressed
by the Stretcher Leveler.”**

**Nicolas Holvoet
Holvoet Plaatbedrijf NV
Gent, Mariakerke, Belgium**

- * Operating cost 20% of P & O
- * Environmentally friendly process
- * Rust resistant material without the use of oil

“We wanted a line that could process high strength material, and guarantee an exceptionally flat product. We also wanted a system that would guarantee our customers better tolerances. After reviewing a number of manufacturers, we selected Red Bud Industries.

SCS® Process

- * Produces flat material that stays flat
- * Equalized stresses eliminate spring back
- * Flatness is independent of incoming shape

At Holvoet quality and service are the starting points in everything we do. The people at Red Bud Industries share these qualities and the same 'hard working spirit'. During the vendor selection process, we recognized that the Red Bud Industries' Line had several capabilities which were unique to our market. We were very impressed with their Stretcher Leveler as it delivers material free of internal stresses. This is very important to our most demanding customers.

Stretcher Leveling

We have been running for several months now and have excellent results. We are receiving orders from customers that - for diverse reasons - want extremely flat material and we are confident that this business will continue to grow in the coming months. It was a great experience working with Red Bud Industries. We thank them for their help and look forward to working with them in the future.”
