## Expanding Capabilities

**Champagne Metals** is an aluminum service center and processor that has been in business for 25 years. They are headquartered in Glenpool, Oklahoma, and also have facilities in Lebanon, Missouri, and Middlebury, Indiana. They serve all of North America, mostly in the automotive and industrial markets.

Champagne Metals was looking to expand their capabilities, specifically in the multi-blanking industry. Since they do not process standard material day in and day out, Red Bud Industries' ability to customize a coil processing line to their exact specifications and needs was very important to them. They also needed a vendor that they could trust to stand behind their machinery after the sale and Red Bud delivered.

"Red Bud's service has been fantastic. They have been very responsive anytime we call. Their hotline is there for any type of issue that we have and they can log in and tell us what to do to fix it. . . We are absolutely satisfied with the way the line is running, and we would definitely look to do future business with Red Bud."
