## Expanding Possibilities

**Friedman Industries** is a flat-rolled and tubular service center headquartered in Longview, Texas. Their recently opened branch on SDI's campus in Sinton, Texas, will allow them to reach new markets in the Southwest and West Coast of the United States and into Mexico with laser flat products coming off of their new Red Bud Industries 1.00" x 96" wide Heavy Gauge Cut-To-Length Line with Stretcher Leveling.

Red Bud checked all of the boxes that Friedman Industries was hoping to achieve with the purchase of their new equipment. Employee safety, value-added features, customer service, and in stock parts delivered the next day were the factors that swayed their decision. Most importantly, Friedman Industries wanted a partner that worked with them and kept the customer's requests a priority.

"We wanted to align ourselves with a manufacturer that has the expertise and knowledge to build the line that we wanted. As Friedman Industries moves into other areas and explores other opportunities, Red Bud will be our first call when it comes to an equipment manufacturer."
